

## MUNICIPALITY OF MORRIS-TURNBERRY

### SPECIAL COUNCIL MEETING AGENDA

Friday, January 24, 2025, 7:00 pm

The Council of the Municipality of Morris-Turnberry will meet for a special session in the Auditorium at the Brussels, Morris, and Grey Community Centre on January 24, 2025, at 7:00 pm, for the purpose of holding a meeting to consider the engineer's report for the Nichol Municipal Drain.

#### 1.0 **CALL TO ORDER**

Disclosure of recording equipment.

#### 2.0 **ADOPTION OF AGENDA**

*Moved by ~  
Seconded by ~*

*THAT the Council of the Municipality of Morris-Turnberry hereby adopts the agenda for the meeting of January 24, 2025, as circulated.*

~

#### 3.0 **DISCLOSURE OF PECUNIARY INTEREST / POTENTIAL CONFLICT OF INTEREST**

#### 4.0 **BUSINESS**

##### 4.1 MEETING TO CONSIDER ENGINEER'S REPORT – NICHOL MUNICIPAL DRAIN

##### 4.1.1 Engineer's Report

In May of 2024, the Council of the Municipality of Morris-Turnberry appointed GEI Consultants to prepare a report varying the assessments for the Nichol Municipal Drain under Section 76 of the *Drainage Act*. In October of 2024, the appointment was amended to include the Rintoul, McDonald, Robb and Pipe Municipal Drains, in as far as they are subsidiary drains to the Nichol Municipal drain.

Notice of the meeting to consider the engineer's report was issued to landowners on January 7, 2025.

Project Engineer Ben Gowing will attend to present the Engineer's report to Council and those in attendance.

##### 4.1.2 Questions and Comments

- Council
- Landowners in attendance

##### 4.1.3 Consideration of Provisional By-Law

*Moved by ~  
Seconded by ~*

*THAT leave be given to introduce By-Law # 04-2025, being a by-law to provisionally adopt the engineer's report for the Nichol Municipal Drain 2024, and that it now be read a first and second time this 24<sup>th</sup> day of January 2025.*

~

4.1.4 Date of Court of Revision and appointment of members.

*Moved by ~  
Seconded by ~*

*THAT the Court of Revision for the Nichol Municipal Drain 2024 be set for February 18<sup>th</sup>, 2025 at 7:30 pm;*

*AND FUTHER THAT the members of the Court of Revision for the Masson Municipal Drain 2024 shall be:  
1 – Alvin McLellan, Councillor, Huron East  
2 – Jamie Heffer, Mayor, Morris-Turnberry  
3 – Kevin Freiburger, Deputy Mayor, Morris-Turnberry*

*~*

**5.0 CONFIRMING BY-LAW**

*Moved by ~  
Seconded by ~*

*THAT leave be given to introduce By-Law 05-2025, being a by-law to confirm the proceedings of the Municipality of Morris-Turnberry meeting of Council held on January 24, 2025, and that it now be read severally a first, second, and third time, and finally passed.*

*~*

**6.0 ADJOURNMENT**

*Moved by ~  
Seconded by ~*

*THAT the Council of the Municipality of Morris-Turnberry does now adjourn at \_\_\_\_ pm.*

*~*

**NEXT MEETINGS:**

Special Meeting of Council – Tuesday, January 28, 2025, 9:00 am  
Regular Meeting of Council – Tuesday, February 4, 2025, 7:30 pm  
Regular Meeting of Council – Tuesday, February 18, 2025, 7:30 pm

# Nichol Municipal Drain Engineer's Report The Municipality of Morris-Turnberry

**Submitted by:**

GEI Consultants Canada Ltd.  
975 Wallace Avenue North  
Listowel, Ontario, N4W 1M6

December 2024  
Project No. 2404611

---

Matt Ash, C.E.T.  
Project Designer

Ben Gowing, P.Eng.  
Project Engineer

Mayor and Council of the Municipality of Morris-Turnberry:

We are pleased to present our report on the Nichol Municipal Drain 2024 serving Lots 21 to 30, Concessions 5 to 7 Morris in the Municipality of Morris-Turnberry, and various properties located within the settlement area of Brussels in the Municipality of Huron East, all in the County of Huron.

Authority to prepare this report was obtained by a resolution of Morris-Turnberry Council as stated in its May 28<sup>th</sup>, 2024 letter to appoint GEI Consultants Canada Ltd. (GEI), formerly GM BluePlan Engineering, to prepare an Engineer's Report. This appointment was subsequently amended to include the sub-watersheds of the Nichol Drain, namely the Pipe Municipal Drain, McaDonald Municipal Drain, Robb Municipal Drain, and Rintoul Municipal Drain.

In accordance with your instructions pursuant to a request received by Council under Section 76 of the Drainage Act, R.S.O. 1990, for a request to vary the original assessments for maintenance, GEI has held an on-site meeting, obtained parcel mapping, and prepared for Council's consideration the following Engineer's Report for the Nichol Municipal Drain watershed.

We trust that the information contained within will be satisfactory. If there are any questions or concerns please do not hesitate to contact us.

Yours truly,

GEI Consultants Canada Ltd.

Per:

Matt Ash, C.E.T.

Encl.

## APPENDICES

APPENDIX 'A': SCHEDULES OF ASSESSMENTS FOR FUTURE MAINTENANCE

APPENDIX 'B': WATERSHED DRAWINGS

## 1. Introduction

At the request of the Council of the Municipality of Morris-Turnberry, GEI Consultants Canada has been appointed under Section 76 of the Drainage Act to vary the original assessments for maintenance purposes for the Nichol Municipal Drain. As this drainage system spans two municipalities, this report was authorized by a decision of the Ontario Agricultural, Food and Rural Affairs Appeals Tribunal dated May 21<sup>st</sup>, 2024 in accordance with the requirements of the Act. It was discovered that the Nichol Drain watershed contained sub-watersheds that are considered separate municipal drains, namely the Pipe Municipal Drain, Robb Municipal Drain, MacDonald Municipal Drain, and Rintoul Municipal Drain. As alterations to the Nichol Drain assessment schedule would necessarily result in changes to the sub-watersheds as well, Council subsequently amended the appointment to include these other drains in the re-assessment. The sub-watersheds are located entirely in Morris-Turnberry, therefore no further application to the Tribunal was required.

The purpose of this report is to capture all changes that have occurred in the Nichol Drain watershed, including severances, mergers, change of use, or alteration in drainage patterns, and to reflect all of these changes in an updated Schedule of Future Maintenance Assessments. The updated schedule will permit Morris-Turnberry to properly and fairly charge for any future maintenance to be undertaken on this system.

## 2. History

The Municipality of Morris-Turnberry has provided background municipal drain maps and reports.

The Nichol Municipal Drain was originally adopted under the Municipal Drainage Act through a report prepared by John Roger, OLS in June of 1910. The existing drain as adopted in 1910 consisted of an open ditch starting from Lot No. 30 Concession 7 down to the Mainland River on Lot No. 21 Concession 5, as well as Branches 'A', 'B', 'C' and 'D' which were all constructed of field tile.

Subsequent to adoption, there have been various reports issued involving improvements to the drainage system, the construction of additional Branches 'E' and 'F', and other works including maintenance. Engineering reports for the Nichol Drain, or its branches, were issued in 1924, 1956, 1976, 1988, 1994, and most recently in 2012.

The Nichol watershed also includes four drainage systems that are tributary to the Nichol Drain but are considered independent municipal drains and not branches of the Nichol. Within the watershed are the Rintoul Municipal Drain, the MacDonald Municipal Drain, the Robb Municipal Drain, and the Pipe Municipal Drain. All of these drainage systems outlet to the Nichol Drain at some point along its length.

The most recent report which includes a maintenance schedule for the entire watershed is the 1994 report issued by Maitland Engineering Services. This report includes 62 properties in the former Township of Morris, 11 properties in the former Township of Grey, and 28 properties in Brussels, for a total of 101 properties not including roadways, as responsible for a maintenance of the Nichol Municipal Drain. As comparison, we find that the watershed now includes 55 properties in the Municipality of Morris-Turnberry, and 68 in the Municipality of Huron East, a total of 123 properties not including roadways.

### 3. Proceedings Under the Drainage Act

The Drainage Act is a vehicle by which a drainage scheme can be constructed and the cost raised by local special assessment. That is, the cost is assessed in varying proportions to lands within the watershed, as a one-time charge over and above any taxes paid. Maintenance of the drain is likewise charged to the watershed, most often in the same proportions as the original construction.

The Act has evolved over many years and attempts have been made to balance the rights of the individual against the benefits of the construction of drains that involve more than one property. The Act recognizes that perfect agreement is not possible in every case and provides a number of proceedings that give owners and others the opportunity to influence the outcome.

This Report is one of those proceedings. To aid in the understanding of the process listed below in chronological order are all normal proceedings with the notation “Completed” beside those which have been completed. This listing is a summary of many but not all parts of the Drainage Act and applies to the ordinary course of events under a report issued under Section 76 of the Act. Further proceedings are available, and for these the Drainage Act should be consulted directly.

1. Submission of Request to the Drainage Tribunal. *Completed.*
2. Engineer appointed. *Completed.*
3. On-site meeting. *Completed.*
4. Preparation of Report. *Completed.*
5. Report considered by Council and a By-Law is adopted.
6. Court of Revision convened to consider and deal with appeals on assessment if necessary.
7. Appeal is available from the decisions of the Court of Revision and on other matters to the Ontario Drainage Tribunal.
8. Disposition of appeals by the Tribunal, or if none, final passage of the By-Law, which establishes the drain in law and authorizes construction.
9. Levying and collecting of assessments.

### 4. On-Site Meeting

In accordance with Section 9(1) of the Drainage Act, R.S.O. 1990 an on-site meeting was held on July 4<sup>th</sup>, 2024. The meeting was scheduled to take place at 10:00 am at the offices of the Municipality of Morris-Turnberry.

A handout was distributed which described the municipal drain and included a map of the pertinent part of the watershed, and preliminary results of the investigation to date. Landowners were invited to make comments and raise any concerns, both at this meeting or subsequently by correspondence directly with the Engineer.

It was noted at this meeting that Section 76 of the Act permits only the varying of assessments for maintenance purposes, and no physical alterations or construction work are permitted as part of this process. Costs to produce this report are distributed to all landowners in the watershed.

## 5. Watershed

Generally, when a report is prepared under Section 76 for an existing drainage system, major changes to the watershed limits are discouraged unless there are specific requests from landowners. However, it is not uncommon for there to be minor adjustments to account for local topography or other elements which may have been previously overlooked.

The updated watershed for the Nichol Drain was developed by examining the catchment area as determined by all previous reports, including the tributary Rintoul, MacDonald, Robb and Pipe Municipal Drains. As well, the adjacent Workman Municipal Drain was examined to ensure that catchment area aligned with the Nichol catchment area without overlap or missing areas. As a final check, contour and LiDAR mapping available from Land Information Ontario was overlaid on the watershed to determine if any obvious errors were present. Minor adjustments to the watershed boundary were made where appropriate, and internal watershed boundaries between the branches and tributaries were similarly adjusted to ensure there was no overlap. It should be noted that property lines are not typically used to define the watershed boundary although roads may occasionally be used where they form a physical barrier to water flow.

The final watershed for the Nichol Municipal Drain was determined to be approximately 1092.3 hectares (2,698 acres) in size and contains 123 individual properties as well as 9 road allowances for a total property count of 132. The Nichol Municipal Drain watershed currently contains the following drainage systems:

- a) The Main Drain begins at the outlet into the Middle Maitland River, station 0+000 on North Part Lot 21 Concession 5, and extends easterly to Part Lot 28 Concession 5 where it turns south and crosses under Morris Road, at station 3+559. From this point the Main Drain extends generally southerly to the north side of Cranbrook Road at station 5+696, then turning westerly and extending to its upstream terminus at the property line between South Part Lot 27 and South Part Lot 26 Concession 6, at station 6+589. The Main Drain is an open ditch section for the entire length except the section which extends along Cranbrook Road, from station 5+696 to 6+589, which is a tile system.
- b) Branch 'A', last improved in 1988, outlets to the Main Drain at station 5+696. This branch extends south under Cranbrook Road and has its upstream end at the property line between the municipal cemetery and North Part Lot 30 Concession 7. Branch 'A' is a buried system consisting of 300mm and 250mm diameter tiles and is approximately 934m long.
- c) Branch 'B', last improved in 1994, is a 655m long buried system consisting of 300mm and 380mm diameter tiles. It connects to Branch 'A' near the east property line of Part Lot 30 Concession 7 and extends westerly to its upstream end between Part Lot 29 and Part Lot 28 Concession 7.
- d) Branch 'C' was last improved in 1994 and serves lands on the eastern edge of the watershed. The branch connects to the Main Drain at station 5+288 and extends upstream to the east, crossing under Brussels Line near property #84416 Brussels Line, and extending southwards from that point to Bolton Road. Branch 'C' is approximately 1,036m in length and is constructed of 600mm, 533mm, 300mm and 200mm diameter drain tiles.

- e) Branch 'D', for which there is very little information available, appears to connect to the Main Drain at approximately station 5+106. We understand Branch 'D' is a buried tile system and it is possible that it dates to 1910. From mapping, it appears this branch serves only 1 property and the Municipality may wish to consider abandoning Branch 'D'.
- f) Branch 'E' is a very small extension from Branch 'A' that serves the municipal cemetery only and consists of 70m of 150mm plastic field tile.
- g) Branch 'F', last improved in 1994, extends easterly from the Main Drain at station 4+571 and primarily serves Frederick Street in Brussels. The branch consists of two runs, called the 'A' drain and 'B' drain. The 'A' drain is approximately 243m in length and consists of 400mm and 350mm diameter buried tile, and the 'B' drain is approximately 43m in length and consists of 200mm buried tile.
- h) The Huronview Municipal Drain connects to the Main Drain at or around station 4+571 and extends easterly to serve the Huronlea complex owned by Huron County at 820 Turnberry Street. This system serves only the one property and is a buried tile system approximately 430m in length.
- i) The Pipe Drain serves properties in the northwest area of the Nichol watershed and outlets to the Main Drain at station 1+122. The Pipe Drain extends upstream into North Part Lot 23 Concession 6 and is entirely an open ditch system, except for the crossing under Morris Road. It is approximately 1,500m in length. The Pipe Drain watershed is approximately 59.3 hectares (146 acres) in size.
- j) The Rintoul Drain serves properties immediately to the east of the Pipe Drain and outlets to the Nichol Main Drain at station 1+917. This drain was last improved in 2016 and consists of a main drain as well as branches 'B' and 'C'. The Rintoul is a buried pipe system in the lower reaches, and open ditch system through the bush areas on lots 24 and 25 Concession 6 to Nichol Line, and then again a buried tile system east of Nichol Line. Branch 'B' is a buried tile system, and branch 'C' is an open system in the lower reaches through the bush areas, and a buried tile system upstream on South Part Lot 25 Concession 6 to the top end on Nichol Line. The Rintoul main drain is approximately 2,260m in length, branch 'B' is 316m in length, and branch 'C' is 1,157m in length. The Rintoul Drain, including its branches, contains a watershed approximately 181 hectares (447 acres) in size.
- k) The MacDonald Drain, east of the Rintoul, connects to the Nichol Main Drain at station 3+223 and extends south from that part under Morris Road with its upstream end on South Part Lot 26 Concession 6 for a total length of approximately 2,000m. The MacDonald also includes a short branch 'A' which drains a small part of Sout Part Lot 27 Concession 6. The MacDonald Drain appears to have been constructed sometime between 1924 and 1956 and is a buried tile system. The MacDonald watershed is 80.8 hectares (200 acres) in size.
- l) Serving lands in the south part of the Nichol watershed, the Robb Municipal Drain consists of a main drain and a branch '1'. The main drain is approximately 1,890m in length and the short branch '1' is 250m in length. The Robb Drain is a buried tile drainage system and appears to have been originally constructed prior to 1924. The Robb watershed is 111 hectares (274 acres) in size.

Appendix 'B' contains drawings showing the entire Nichol Municipal Drain watershed including all branch and tributary drains, with all properties within identified by roll number. Drawings are also provided showing the watershed of each branch and tributary drainage system.

## 6. New Assessment Schedules

Section 76 of the Drainage Act allows for a report to be prepared by an Engineer on behalf of a municipality in order to address changes to the assessment of maintenance works for a municipal drain. Such a report may be warranted if a municipal drain is constructed by by-law under the Drainage Act and circumstances arise that require adjustment to the originally set maintenance schedules. Section 76 of The Drainage Act is stated as follows:

*“The council of any local municipality liable for contribution to a drainage works in connection with which conditions have changed or circumstances have arisen such as to justify a variation of the assessment for maintenance and repair of the drainage works may make an application to the Tribunal, of which notice has been given to the head of every other municipality affected by the drainage works, for permission to procure a report of an engineer to vary the assessment, and, in the event of such permission being given, such council may appoint an engineer for such purpose and may adopt the report but, if all the lands and roads assessed or intended to be assessed lie within the limits of one local municipality, the council of that municipality may procure and adopt such report without such permission. R.S.O. 1990”*

Should the municipality wish to undertake repair work on the Nichol Municipal Drain and/or any of its branches or tributary drains, any costs would currently need to be assessed to the landowners within the watershed using the maintenance schedules as set in the most recent report. The most recent report to address the entire watershed was the report issued in 1994 by Maitland Engineering Services. However, this report did not address the individual branches nor the tributary drains within the Nichol watershed. Furthermore, there have been numerous changes within the watershed since 1994. This is clearly an untenable situation that warrants a reassessment of the entire drainage area.

## 7. Methodology

To determine an updated schedule for future maintenance work, properties are assessed based on their outlet liability. That is, the proportion of assessment for drainage work will be assessed on the proportion of water an individual property is assumed to contribute to the drain. To determine the proportion of water a property contributes, two factors are utilized; property area and equivalent area factors. Property area refers to the area of a parcel that lies inside the watershed boundary only. Equivalent area factors take into account current land use, and in certain cases potential future use where that use can be confidently determined. Equivalent area factors are determined by the Engineer and reflect, in general terms, the amount of runoff that a property is likely to contribute to the drainage system in comparison to an equivalent sized agricultural parcel. They can be influenced by zoning but are not determined by zoning alone. The use of equivalent area factors allows for a fairer proportion of the overall assessment based on the proportion of water each individual property sends to the municipal drain.

For this report, agricultural land was used as a baseline, with a factor of 1.0. Other land types were given a factor to account for surface permeability differences that cause water to flow over the ground surface rather than infiltrate into the ground. A list of the equivalent area factors used in this report is as follows:

Land Use	Equivalent Area Factor
Agricultural	1.0
Bush	0.5
Wetland / Swamp	0.2

Residential	1.33
Commercial	1.67
Industrial	1.67
Road <sup>1</sup>	1.75

1 – As per MTO policy

## 8. Recommendations

This report provides updated assessment schedules so that future maintenance works can be more fairly proportioned against the lands and roads within the watershed of the Nichol Municipal Drain, including all branches and tributary drains. Two additional assessment schedules are provided; one for maintenance performed upstream (south) of Morris Road starting at station 3+595, and one for maintenance performed only on the closed tile section of the Nichol Main Drain starting at station 5+696. All roads are also included in the maintenance schedules and are assessable for downstream maintenance, however it should be noted that maintenance of road crossings themselves is entirely the responsibility of the applicable road authority.

We recommend that costs related to recent and/or future drain maintenance operations be prorated using the attached Maintenance Schedules. These costs can not be fairly assessed until the adoption of this report under by-law is completed.

The proposed Maintenance Schedules for the assessment of future maintenance works can be found in Appendix 'A' of this report. We further recommend that these maintenance schedules be continually updated as future severances, consolidations, and zoning amendments occur. Section 65 of the Drainage Act states as follows:

### ***“Changes in assessment***

#### ***Subsequent subdivision of land***

*65. (1) If, after the final revision of an engineer’s assessment of land for a drainage works, the land is divided by a change in ownership of any part, the clerk of the local municipality in which the land is situate shall instruct an engineer in writing to apportion the assessment among the parts into which the land was divided, taking into account the part of the land affected by the drainage works. 2010, c. 16, Sched. 1, s. 2 (26).*

#### ***Agreement on share of assessment***

*(2) If the owners of the subdivided land mutually agree on the share of the drainage assessment that each should pay, they may enter into a written agreement and file it with the clerk of the local municipality and, if the agreement is approved by the council by resolution, no engineer need be instructed under subsection (1). 2010, c. 16, Sched. 1, s. 2 (26).*

#### ***Subsequent connection to drainage works, etc.***

*(3) If an owner of land that is not assessed for a drainage works subsequently connects the land with the drainage works for the purpose of drainage, or if the nature or extent of the use of a drainage works by land assessed for the drainage works is subsequently altered, the clerk of the local municipality in which the land is situate shall instruct an engineer in writing to inspect the land and assess it for a just proportion of the drainage works, taking into account any compensation paid to the owner of the land in respect of the drainage works. 2010, c. 16, Sched. 1, s. 2 (26).”*

We recommend that all future severances or changes in land use within this drain be accounted for in the maintenance schedule through the use of Section 65 and that the cost of adjusting the schedule be paid by the parties to the severance or change in use.

Future maintenance costs for laneway culverts or other private crossings considered part of the drainage works shall be assessed 50% to the benefitting landowner with the remainder assessed to all upstream landowners on a pro rata basis as per the schedule of maintenance assessment. Future maintenance costs for all roadway crossings shall be assessed 100% to the applicable road authority.

## 9. Cost and Grants

The cost to prepare this report is fixed at **\$20,000.00** inclusive of HST and shall be assessed to the landowners on the basis of 2/3 benefit and 1/3 outlet. Each of the 132 properties and road allowances within the watershed will be assessed as benefit a fixed amount of \$101.01 which represents 2/3 of the cost to prepare this report. The remaining 1/3 of the cost will be assessed as outlet to all properties and road allowances in the watershed in the same proportion as future maintenance, as shown on the attached Main Drain assessment schedule.

The cost to prepare this report includes attendance at meetings to consider the report and court of revision, but does not include attendance at the Drainage Tribunal or the Court of the Drainage Referee, should that become necessary.

As per Provincial policy, no grant is available to privately owned agricultural lands for the preparation of an Engineer's Report under Section 76 of the Drainage Act. However, where future maintenance works are conducted a 1/3 grant may be available to privately owned agricultural lands. For additional details, please reference the Agricultural Drainage Infrastructure Program (ADIP) available from the Ontario Ministry of Agricultural, Food and Rural Affairs.

## 10. Summary

On behalf of the Municipality of Morris-Turnberry, under direction of Section 76 of the Drainage Act, updated assessment schedules for future maintenance of the Nichol Municipal Drain, Rintoul Municipal Drain, MacDonald Municipal Drain, Robb Municipal Drain, and Pipe Municipal Drain, including all branches thereto have been prepared.

After the adoption of this report, the Nichol, Rintoul, MacDonald, Robb and Pipe Municipal Drains shall be maintained the Municipality of Morris-Turnberry, with the cost of all maintenance work to be assessed to all upstream roads and lands pro rata within the Maintenance Schedules provided in this report.

All of which is respectfully submitted.

GEI CONSULTANTS CANADA LTD.

**CORPORATION OF THE MUNICIPALITY OF MORRIS-TURNBERRY**

**BY-LAW NO. 04-2025**

---

Being a by-law to adopt an engineer's report to vary original assessments for drainage works in the Municipality of Morris-Turnberry in the County of Huron.

---

**WHEREAS** the Council of the Municipality of Morris-Turnberry, in the County of Huron has procured a report under section 76 of the *Drainage Act, R.S.O. 1990* for the varying of the original assessments for maintenance for the Nichol Municipal Drain, including the sub-watersheds of the Nichol Drain, being the Pipe Municipal Drain, MacDonald Municipal Drain, Robb Municipal Drain, and Rintoul Municipal Drain;

**AND WHEREAS** the report dated December, 2024, has been authored by GEI Consultants Canada Ltd. of 975 Wallace Avenue North, Listowel, Ontario, and said report is attached hereto and forms part of this by-law;

**AND WHEREAS** the Council of the Municipality of Morris-Turnberry is of the opinion that the varying of assessments for the aforementioned Municipal Drains is desirable;

**NOW THEREFORE**, the Council of the Corporation of the Municipality pursuant to the Drainage Act enacts as follows:

**1. Authorization**

The attached report is adopted. The assessment schedules contained therein shall be in effect as of the date of the passing of this by-law.

**2. Debentures**

This project shall not be debentured.

**3. Payment**

- a. All assessments of \$1,000.00 or less are payable in the first year in which the assessment is imposed.
- b. All assessments under \$30.00 shall be added to the municipal tax roll to be collected in the same manner and at the same time as other taxes collected.

**4. Citation**

This By-law comes into force on the final passing thereof and may be cited as the "Nichol Municipal Drain 2024 By-law."

**Read a FIRST and SECOND time and PROVISIONALLY ADOPTED this 24<sup>th</sup> day of January, 2025.**

**CORPORATION OF THE MUNICIPALITY OF MORRIS-TURNBERRY**

**BY-LAW NO. 05-2025**

---

Being a by-law to confirm the proceedings of the Council of the Corporation of the Municipality of Morris-Turnberry, for its meeting held on January 24, 2025.

---

**WHEREAS** Section 9 of the *Municipal Act 2001, S.O. 2001, c. 25* provides that a municipality has the capacity, rights, powers and privileges of a natural person for the purpose of exercising its authority under this or any other Act;

**AND WHEREAS** Section 5 (3) of the *Municipal Act 2001, S.O. 2001, c. 25* provides that a municipal power, including a municipality's capacity, rights, powers and privileges under Section 9, shall be exercised by by-law unless the municipality is specifically authorized to do otherwise;

**AND WHEREAS** it is deemed expedient that the proceedings of the Council of the Corporation of the Municipality of Morris-Turnberry for the January 24, 2025, meeting be confirmed and adopted by By-law;

**NOW THEREFORE**, the Council of the Corporation of the Municipality of Morris-Turnberry enacts as follows:

1. The action of the Council of the Corporation of the Municipality of Morris-Turnberry at its meeting held on January 24, 2025, in respect of each recommendation contained in the Minutes and each motion and resolution passed and other action taken by the Council of the Corporation of the Municipality of Morris-Turnberry at the meeting, is hereby adopted and confirmed as if all such proceedings were expressly embodied in this By-Law; and
2. The Mayor and proper officials of the Corporation of the Municipality of Morris-Turnberry hereby authorize and direct all things necessary to give effect to the action of the Council to the Corporation of the Municipality of Morris-Turnberry referred to in the preceding section thereof;
3. The Mayor and CAO/Clerk are authorized and directed to execute all documents necessary in that behalf and to affix thereto the Seal of the Corporation.
